Detailed Action

This application and Serial Number 08/729,413 were forwarded to the Board of Appeals and Interferences on 3/3/99 for a proposed interference. The applications were returned to Technology Center 1600 after the Board concluded that there is no interference in fact and that both applications claim patentably distinct inventions. Prosecution in the instant case is now resumed.

The indicated allowability of claims 1-8 is withdrawn in view of the following grounds of rejection.

35 USC 112, 2nd Paragraph Rejections

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 5 (and dependent claims) are vague in the recitation of the phrase "capable of". Applicants recite nucleic acids or vectors "capable of" expressing a thioredoxin protein or a heterologous protein. Use of "capable of" language implies that the nucleic acid or the vector is capable of expressing the protein under some circumstances and incapable of expressing it under other undisclosed circumstances. It is unclear under what circumstances the nucleic acid or vector is capable of expressing the protein and under what circumstances

Art Unit: 1636

it is not capable of expressing the protein. Redrafting the claims to recite a "nucleic acid sequence **which** expresses" or a "vector **which** expresses" would be remedial.

The Drawings filed 4/30/1997 are objected to for reasons cited on the PTO-948 form mailed 4/14/1998.

Claims 9-13 are allowed.
